

## **Environmental and Climate Change roundtable Recommendation**

We recognise that the leading part in environmental problems of the Black Sea region is played the global problems, such as climate change, energy problem, foodstuffs problem, environmental contamination and, in particular, waters problem. We agree that our joint actions and projects should be concentrated round key problems and only such the cohesions actions will give additional effect, however

We pay attention of all public to problems of unreasonable development of new coastal territories, their capture, high rates of building in a coastal zone, infringement of the legislation and common sense concerning use of a coastal zone of Black sea.

As the problem of a plastic waste which from local has turned to a global problem is sharp. Among priorities of the activity we see advancement of effective power, organic agriculture, public informing, ecological education.

We recognized that calls of modern time demand more professional approach from NGO, efficient control time, the finance and knowledge.

We state the concern in connection with necessity of more open dialogue between NGO and donors, including, representing EU. Also we support more transparent, effective and fair schemes of financing. It will allow to overcome outlined barriers to development and formation of a civil society and ecological democracy.

We suggest to co-ordinate efforts environmental NGO round key dates and to make one of effective tools BS Action Day, Earth Day, Danube Day on the basis of coordination of key events and holidays.
